-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 07 April 2008.
- 2a) This action is **FINAL**. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-23 is/are pending in the application.
 - 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1-23 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 - a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. Claims 1-23 are pending. Applicant's argument and amendments filed 7/7/08 have been entered.

Objections/Rejections Withdrawn

The following objections/rejections as set forth in the Office action mailed 4/7/08 have been withdrawn:

None.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was

not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Hage et al (US 2003/0232732) or Hage et al (US 2003/0230736).

The applied reference has a common assignee/inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

'736 teaches a bleaching composition containing a transitional metal bleach catalyst containing a ligand which is the same as recited by the instant claims and the balance carriers and adjunct ingredients, together with at least 2% by weight of a peroxygen bleach or source thereof. See Abstract and claims 1-27. '736 discloses the claimed invention with sufficient specificity to constitute anticipation.

'732 teaches a bleaching composition containing, in an aqueous medium, a bicycle ligand which forms a complex with a transition metal which is the same ligand as recited by the instant claims. See claims 1-7. Additionally, '732 teaches that all “air bleaching” catalysts disclosed may be used as a peroxy activating catalyst and that catalysts of the present invention may be incorporated into a composition together with

Art Unit: 1796

a peroxy species or source thereof. Suitable ranges of a peroxy species or source thereof are disclosed in US Pat. No. 6,022,490 which is incorporated by reference. See para. 28. US 6,022,490 teaches that suitable peroxygen bleaches include sodium perborate tetrahydrate, etc., which may be used in amounts of 5 to 35% by weight of the composition which falls within the range of bleach as recited by the instant claims. See column 4, lines 45-65 of US 6,022,490. '732 discloses the claimed invention with sufficient specificity to constitute anticipation.

Accordingly, the teachings of '736 or '732 anticipate the material limitations of the instant claims.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-23 provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-23 of copending Application No. 10/576647 in view of Hermant et al (US 6,022,490) or WO00/60045.

Claims 1-23 of 10/576649 encompass all the material limitations of the instant claims except for the inclusion of a peroxygen bleach.

Hermant et al teach a bleach and oxidation catalyst which can activate hydrogen peroxide, etc. See Abstract. The bleach catalysts can be used in compositions containing 5 to 35% by weight of a bleach such as sodium perborate, etc. See column 4, lines 45-65.

'045 teaches a bleaching system comprising a transition metal bleach catalyst which is the same as recited by the instant claims and optionally a source of hydrogen peroxide. See Abstract. The source of hydrogen peroxide may be sodium perborate, etc. and may be present in amounts from 5% to 80% by weight of the composition. See page 5, line 5 to page 6, line 20.

It would have been obvious to one of ordinary skill in the art, at the time the invention was made, to use sodium perborate in amount of at least 2% by weight in the composition claimed by 10/576647, with a reasonable expectation of success, because Hermant et al or '045 teaches the use of sodium perborate in an amount of at least 2% by weight in combination with a transition metal bleach catalyst and further, 10/576647 claims the use of adjunct ingredients which would encompass bleaches such as sodium perborate.

This is a provisional obviousness-type double patenting rejection.

Response to Arguments

With respect to the rejection of the instant claims under 35 USC 102(e) using Hage et al (US 2003/0232732) or Hage et al (US 2003/0230736), Applicant states that neither of the references teaches a ligand "wherein at least one of R1 and R2 is a non-aromatic hydrocarbon group; the hydrocarbon group being a C8-C22 alkyl chain" as present claimed. Further, Applicant states that evidence of unexpected and superior results of the claimed invention is presented in the instant specification and a statement of common ownership has also been filed with respect to obviousness. In response, note that, the Examiner asserts that both Hage et al references teach that at least one of R1 and R2 may be a C1-C24 optionally substituted alkyl group (See paras. 10-17 of '732 and paras. 10-15 of '736) and that this teaching is sufficiently specific such that one of ordinary skill in the art would immediately envisage and readily ascertain the exact same ligand wherein at least one of R1 and R2 is a C8-C22 optionally substituted alkyl group as recited by the instant claims. Thus, the Examiner maintains that '732 or '736 disclose the claimed invention with sufficient specificity to constitute anticipation under 35 USC 102. Note that, a statement of common ownership is not sufficient to overcome a rejection for anticipation under 35 USC 102 and thus, since the rejection of the instant claims under 35 USC 102(e) for anticipation has been maintained, as set forth above, the statement of common ownership submitted by Applicant is insufficient to overcome this rejection.

Further secondary considerations such as evidence of unexpected and superior results is not sufficient to overcome a rejection for anticipation under 35 USC 102. Note

that, evidence of secondary considerations, such as unexpected results or commercial success, is irrelevant to 35 USC 102 rejections and thus cannot overcome a rejection so based. In re Wiggins, 488 F.2d 538, 543, 179 USPQ 421, 425 (CCPA 1973). See MPEP 2131.04.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory R. Del Cotto whose telephone number is (571) 272-1312. The examiner can normally be reached on Mon. thru Fri. from 8:30 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon can be reached on (571) 272-1498. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
